Kelas : A

AKTIVITAS MANDIRI 5 — CRUD Lengkap Mahasiswa

1. Buat Resource Controller: `php artisan make:controller MahasiswaController --resource --model=Mahasiswa`

```
PS C:\Users\Bayu\tugas_pweb> php artisan make:controller MahasiswaController --resource --model=Mahasiswa  
  
INFO Controller [C:\Users\Bayu\tugas_pweb\app\Http\Controllers\MahasiswaController.php] created successfully.
```

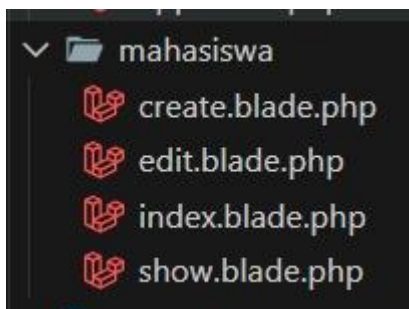

```
app > Http > Controllers > MahasiswaController.php > PHP Intelephense >
1  <?php
2
3  namespace App\Http\Controllers;
4
5  use App\Models\Mahasiswa;
6  use Illuminate\Http\Request;
7
8  class MahasiswaController extends Controller
9  {
10     public function index()
11     {
12         //
13     }
14
15     public function create()
16     {
17         //
18     }
19
20     public function store(Request $request)
21     {
22         //
23     }
24
25     public function show(Mahasiswa $mahasiswa)
26     {
27         //
28     }
29
30     public function edit(Mahasiswa $mahasiswa)
31     {
32         //
33     }
34
35     public function update(Request $request, Mahasiswa $mahasiswa)
36     {
37         //
38     }
39
40     public function destroy(Mahasiswa $mahasiswa)
41     {
42         //
43     }
44 }
45
```

2. Daftarkan di routes/web.php: `Route::resource('mahasiswa', MahasiswaController::class)`

```
routes > web.php > ...
1  <?php
2
3  use Illuminate\Support\Facades\Route;
4  use App\Http\Controllers\MahasiswaController;
5
6  Route::get('/', function () {
7      return redirect('/dashboard')->with('success', 'Berhasil masuk dashboard!');
8  });
9
10 Route::get('/dashboard', function () {
11     return view('dashboard');
12 });
13
14 Route::get('/tentang', function () {
15     return view('tentang');
16 });
17
18 Route::get('/kontak', function () {
19     return view('kontak');
20 });
21
22 Route::resource('mahasiswa', MahasiswaController::class);
23
```

3. Buat semua view: mahasiswa/index.blade.php (tabel + pagination), create.blade.php (form), edit.blade.php (form pre-filled), show.blade.php (detail)

4. Implementasi method index() — ambil semua mahasiswa dengan paginate(10) dan tampilkan ke view

```
public function index()
{
    $mahasiswa = Mahasiswa::paginate(10);
    return view('mahasiswa.index', compact('mahasiswa'));
}
```

```

resources > views > mahasiswa > index.blade.php > table
1  @extends('layouts.app')
2
3  @section('content')
4
5  <h1>Data Mahasiswa</h1>
6
7  <a href="{{ route('mahasiswa.create') }}">Tambah Mahasiswa</a>
8
9  <table border="1" cellpadding="10">
10     <tr>
11         <th>NIM</th>
12         <th>Nama</th>
13         <th>Email</th>
14         <th>Jurusan</th>
15         <th>IPK</th>
16         <th>Aksi</th>
17     </tr>
18
19     @forelse($mahasiswa as $mhs)
20     <tr>
21         <td>{{ $mhs->nim }}</td>
22         <td>{{ $mhs->nama }}</td>
23         <td>{{ $mhs->email }}</td>
24         <td>{{ $mhs->jurusan }}</td>
25         <td>{{ $mhs->ipk }}</td>
26         <td>
27             <a href="{{ route('mahasiswa.show', $mhs->id) }}">Detail</a>
28             <a href="{{ route('mahasiswa.edit', $mhs->id) }}">Edit</a>
29         </td>
30     </tr>
31     @empty
32     <tr>
33         <td colspan="6">Data kosong</td>
34     </tr>
35     @endforelse
36
37 </table>
38
39 {{ $mahasiswa->links() }}
40
41 @endsection
42

```

5. Implementasi create() dan store() — dengan validasi nim (unique), nama (min:3), email (email|unique), jurusan (in:SI, TI, MI)

```
public function create()
{
    return view('mahasiswa.create');
}

public function store(Request $request)
{
    $validated = $request->validate([
        'nim' => 'required|unique:mahasiswas',
        'nama' => 'required|min:3',
        'email' => 'required|email|unique:mahasiswas',
        'jurusan' => 'required|in:SI,II,MI',
        'ipk' => 'required',
        'semester' => 'required',
        'aktif' => 'required'
    ]);

    Mahasiswa::create($validated);

    return redirect()->route('mahasiswa.index')->with('success', 'Data berhasil ditambahkan');
}
```

```

resources > views > mahasiswa > create.blade.php > ...
1  @extends('layouts.app')
2
3  @section('content')
4
5  <h1>Tambah Mahasiswa</h1>
6
7  <form action="{{ route('mahasiswa.store') }}" method="POST">
8      @csrf
9
10     <input type="text" name="nim" placeholder="NIM"><br><br>
11
12     <input type="text" name="nama" placeholder="Nama"><br><br>
13
14     <input type="email" name="email" placeholder="Email"><br><br>
15
16     <select name="jurusan">
17         <option value="SI">SI</option>
18         <option value="TI">TI</option>
19         <option value="MI">MI</option>
20     </select><br><br>
21
22     <input type="text" name="ipk" placeholder="IPK"><br><br>
23
24     <input type="number" name="semester" placeholder="Semester"><br><br>
25
26     <select name="aktif">
27         <option value="1">Aktif</option>
28         <option value="0">Tidak Aktif</option>
29     </select><br><br>
30
31     <button type="submit">Simpan</button>
32
33 </form>
34
35 @endsection
36

```

6. Implementasi edit() dan update() — tampilkan form dengan old() atau \$mahasiswa->field, validasi unique kecuali ID ini

```

public function edit(Mahasiswa $mahasiswa)
{
    return view('mahasiswa.edit', compact('mahasiswa'));
}

public function update(Request $request, Mahasiswa $mahasiswa)
{
    $validated = $request->validate([
        'nim' => 'required|unique:mahasiswas,nim,' . $mahasiswa->id,
        'nama' => 'required|min:3',
        'email' => 'required|email|unique:mahasiswas,email,' . $mahasiswa->id,
        'jurusan' => 'required|in:SI,II,MI',
        'ipk' => 'required',
        'semester' => 'required',
        'aktif' => 'required'
    ]);

    $mahasiswa->update($validated);

    return redirect()->route('mahasiswa.index')->with('success', 'Data berhasil diupdate');
}

```

```

resources > views > mahasiswa > edit.blade.php > ...
1  @extends('layouts.app')
2
3  @section('content')
4
5  <h1>Edit Mahasiswa</h1>
6
7  <form action="{{ route('mahasiswa.update', $mahasiswa->id) }}" method="POST">
8
9      @csrf
10     @method('PUT')
11
12     <input type="text" name="nim" value="{{ old('nim', $mahasiswa->nim) }}"><br><br>
13
14     <input type="text" name="nama" value="{{ old('nama', $mahasiswa->nama) }}"><br><br>
15
16     <input type="email" name="email" value="{{ old('email', $mahasiswa->email) }}"><br><br>
17
18     <select name="jurusan">
19         <option value="SI" {{ $mahasiswa->jurusan == 'SI' ? 'selected' : '' }}>SI</option>
20         <option value="II" {{ $mahasiswa->jurusan == 'II' ? 'selected' : '' }}>II</option>
21         <option value="MI" {{ $mahasiswa->jurusan == 'MI' ? 'selected' : '' }}>MI</option>
22     </select><br><br>
23
24     <input type="text" name="ipk" value="{{ old('ipk', $mahasiswa->ipk) }}"><br><br>
25
26     <input type="number" name="semester" value="{{ old('semester', $mahasiswa->semester) }}"><br><br>
27
28     <button type="submit">Update</button>
29
30 </form>
31
32 @endsection
33

```

- Implementasi destroy() — dengan konfirmasi JavaScript sebelum hapus

```

public function destroy(Mahasiswa $mahasiswa)
{
    $mahasiswa->delete();

    return redirect()->route('mahasiswa.index')->with('success', 'Data berhasil dihapus');
}

```

Yakin hapus data?

Oke Batal

- Tambahkan flash message di layout dan tampilkan session('success') / session('error')

```

@if(session('success'))
    <div id="success-popup" style="
        position: fixed;
        top: 20px;
        right: 20px;
        background-color: green;
        color: white;
        padding: 15px;
        border-radius: 5px;
        z-index: 9999;
    ">
        {{ session('success') }}
    </div>
@endif

@if(session('error'))
    <div id="error-popup" style="
        position: fixed;
        top: 20px;
        right: 20px;
        background-color: red;
        color: white;
        padding: 15px;
        border-radius: 5px;
        z-index: 9999;
    ">
        {{ session('error') }}
    </div>
@endif

```

Data berhasil dihapus

- The nama field is required.
- The email field is required.
- The ipk field is required.
- The semester field is required.

9. BONUS: Tambahkan fitur upload foto profil dengan validasi image|mimes:jpg,png|max:2048

```
<form action="{{ route('mahasiswa.store') }}" method="POST" enctype="multipart/form-data">
    @csrf

    <input type="text" name="nim" placeholder="NIM"><br><br>

    <input type="text" name="nama" placeholder="Nama"><br><br>

    <input type="email" name="email" placeholder="Email"><br><br>

    <select name="jurusan">
        <option value="SI">SI</option>
        <option value="TI">TI</option>
        <option value="MI">MI</option>
    </select><br><br>

    <input type="text" name="ipk" placeholder="IPK"><br><br>

    <input type="number" name="semester" placeholder="Semester"><br><br>

    <select name="aktif">
        <option value="1">Aktif</option>
        <option value="0">Tidak Aktif</option>
    </select><br><br>

    <input type="file" name="foto"><br><br>

    <button type="submit">Simpan</button>

</form>
```

```
public function store(Request $request)
{
    $validated = $request->validate([
        'nim' => 'required|unique:mahasiswas',
        'nama' => 'required|min:3',
        'email' => 'required|email|unique:mahasiswas',
        'jurusan' => 'required|in:SI,TI,MI',

PS C:\Users\Bayu\tugas_pweb> 
```

4. Coba register dan login di <http://127.0.0.1:8000/register>

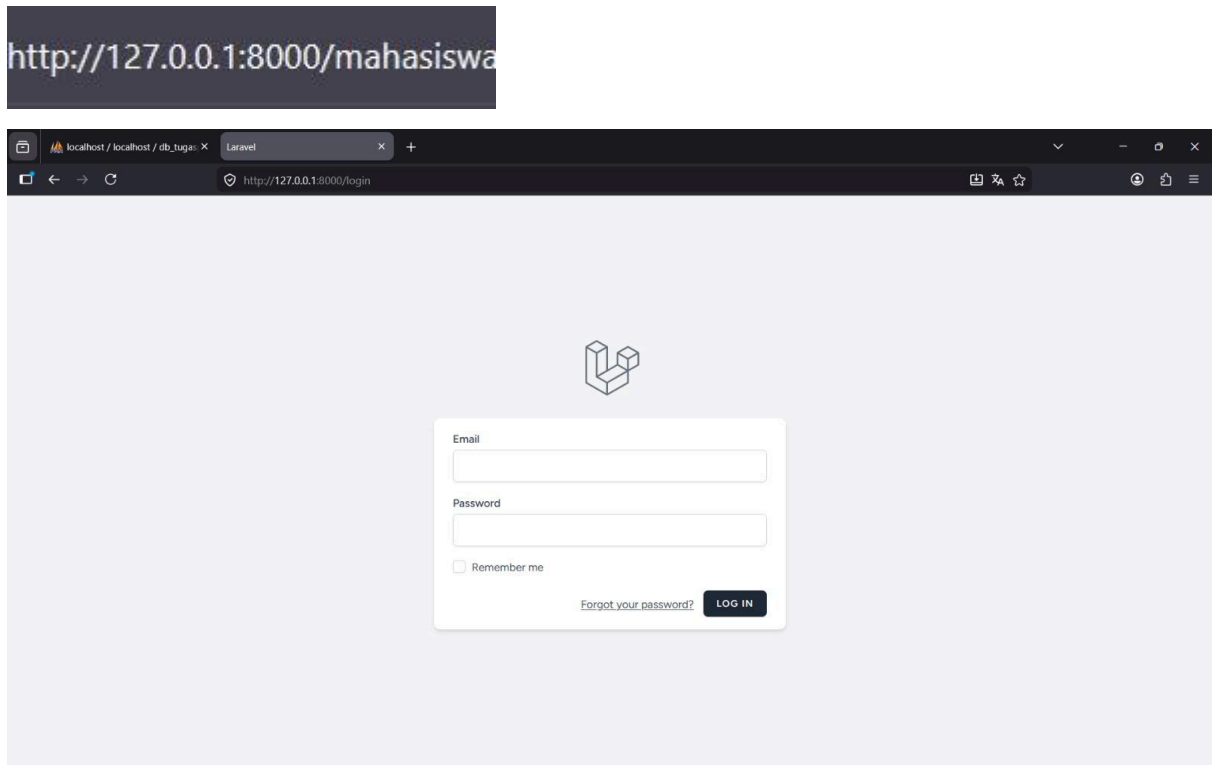

5. Amankan semua route mahasiswa dengan middleware auth:
Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)

```
Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class);

Route::middleware('auth')->group(function () {
    Route::get('/profile', [ProfileController::class, 'edit'])->name('profile.edit');
    Route::patch('/profile', [ProfileController::class, 'update'])->name('profile.update');
    Route::delete('/profile', [ProfileController::class, 'destroy'])->name('profile.destroy');
});
```

6. Coba akses /mahasiswa tanpa login — pastikan diredirect ke halaman login

7. Tambahkan nama user di navbar: `{{ auth()->user()->name }}`

```
<nav>

    <a href="/">Dashboard</a> |
    <a href="/mahasiswa">Mahasiswa</a> |
    <a href="/tentang">Tentang</a> |
    <a href="/kontak">Kontak</a>

    @auth
    | Halo, {{ auth()->user()->name }}

        <form action="{{ route('logout') }}" method="POST" style="display:inline;">
            @csrf
            <button type="submit">Logout</button>
        </form>
    @endauth

</nav>

<hr>
```

[Dashboard](#) | [Mahasiswa](#) | [Tentang](#) | [Kontak](#) | Halo, Siti Gusti Andayani Logout

8. Buat custom middleware CekAdmin yang hanya mengizinkan user dengan role 'admin' mengakses route tertentu

```
PS C:\Users\Bayu\tugas_pweb> php artisan make:middleware CekAdmin
```

```
INFO Middleware [C:\Users\Bayu\tugas_pweb\app\Http\Middleware\CekAdmin.php] created successfully.
```

```
